# PROJECT DETAILS & PROCESS

I began by cleaning the data using R, focusing on standardizing codes and descriptions, filling in missing data.

I then took the cleaned data and integrated it into a Tableau interface, beginning with a basic chart.

Finally, I went through several rounds of feedback and added filters, aggregations, and visualizations.

# PROJECT CHALLENGES

I began by cleaning the data using R, focusing on standardizing codes and descriptions, filling in missing data.

The data had never previously been cleaned, and the size of the dataset led to very long runtimes.

I then took the cleaned data and integrated it into a Tableau interface, beginning with a basic chart.

I don't have any previous Tableau experience, so I dealt with a learning curve in this.

Finally, I went through several rounds of feedback and added filters, aggregations, and visualizations.

# NEXT STEPS & CONCLUSION

- I have been able to do weekly **code reviews** to prepare for handoff
- Currently going through visualization **approval process**
- Dashboard needs to be **updated monthly**
- Aim to get **user feedback and make adjustments** after product launches
